

AN ESTABLISHED LEADER

Renewable Choice has been a leading North American provider of renewable energy credits (RECs) and carbon offsets to businesses, institutions, government agencies and LEED® green buildings for over a decade.

BENEFITS OF SUPPORTING GREEN POWER

When you purchase RECs for your business, you reduce the environmental impact of your electricity use. Your commitment will:

- Support new Canadian renewable power generation
 - ✓ EcoLogo certified green power facilities
 - ✓ Full third party chain-of-custody monitoring
 - ✓ Province-specific pricing available
- Make a meaningful environmental commitment
 - ✓ Expand your corporate sustainability profile
 - ✓ Differentiate your brand and product
- Earn LEED points
 - ✓ Supplied green power to 2,000+ projects globally
 - ✓ Member of Canadian Green Building Council (CaGBC) and USGBC

SUPPORTING CANADIAN WIND PROJECTS

Renewable Choice is dedicated to maintaining a diverse portfolio of wind projects from which we source clean energy, including projects in Canada. Every project we support is third-party audited and certified and meets stringent environmental standards.

East Point Wind Farm, Prince Edward Island, Canada

The East Point Wind Farm came online in 2007 and consists of 10 three-megawatt Vestas V-90 turbines (one of the largest wind turbines installed in North America). Developed by the Provincial Government through the PEI Energy Corporation, the project generates enough electricity to power approximately 9,000 homes annually.

“Canadian Wind Energy Association (CanWEA) found that nine in 10 Ontario residents support the production of wind energy in their region for its economic and environmental benefits”¹

– IPSOS-Reid Jul, 2010

Wind Power provides income for rural landowners and employment opportunities.
